Study Title	Understanding Sustainability: Perspectives of Canadian Occupational Therapists
Principal & Co-Investigators	Jane Davis, MSc, OT Reg. (Ont.), Primary Investigator, and Lecturer Crystal Chan, BSc, Student Occupational Therapist and Researcher Lois Lee, BSc, Student Occupational Therapist and Researcher Department of Occupational Science and Occupational Therapy, University of Toronto
Ethics Approval and REB Number	Ethics Approval Received Protocol: 37005
Purpose & Brief Description of Study	<p>We are two professional masters students from the Department of Occupational Science and Occupational Therapy at the University of Toronto, who, along with our supervisor, are conducting a study on sustainability and Canadian occupational therapy practice.</p> <p>In 2012, the World Federation of Occupational Therapists released a position statement on sustainability and sustainable practice, acknowledging the environmental sustainability crisis that the world is currently facing and the impact of global climate change (WFOT, 2012). We are interested in exploring the perspectives of Canadian occupational therapists on sustainability and your thoughts in response to the release of the WFOT's sustainability position statement.</p> <p>We invite all occupational therapists practicing in Canada to participate in our online survey. It will take about 15 minutes to complete.</p> <p>We appreciate your time - thank you for your consideration in taking part in this study!</p>
Target audience for participation	Canadian Occupational Therapists
