“BE THE
CHANGE
YOU WISH
TO SEE
IN THE
WORLD”
—GHANDI

Let's be the Change we Wish to See!

**Opportunities, challenges & imperatives of
change in Ontario's health care system**

PRESENTED BY: OSOT Executive Director,
Christie Brenchley

Christie will provide an overview of key policy directions affecting health care delivery and access to OT services in Ontario. The intent? To provide access to information and resources to support OTs to;

- be aware of how change may impact their practice opportunities,
- best position their services and the profession to be part of system change solutions, and
- engage in the change process in their organizations and communities.

Materials will be circulated in advance of the webinar to facilitate opportunities for discussion about topics such as Home & Community Care, the Assess & Restore Guideline, Ontario's Special Needs Strategy, services in Long-Term Care Homes, Auto Insurance changes, Mental Health & Addictions Strategy.

These are times of transition...consider the role you and the profession play in the change processes around us. Can we be and lead the change we wish to see?! We think you'll be inspired by some of the opportunities!
