

Telehealth & Occupational Therapy: How the Ontario Telemedicine Network can help you with your practice

Christine Linton

A Webinar Presented By:

Christine Linton,
Provincial Director Adoption at OTN

&

Lisa Ferraro, Regional Lead at Toronto Central LHIN,
Central LHIN & Central LHIN East

Have you thought about extending your OT services to clients who could not come out to see you in the clinic?

What about the privacy concerns regarding personal health information?

Did you know that you can be an individual member of OTN?

The objective of this webinar is to provide an overview of the Ontario Telemedicine Network (OTN) products and services. The presentation will include case scenarios, specifically how some OTs have incorporated telemedicine in their everyday work. Our speakers will conclude with how one becomes an individual member of OTN.

Lisa Ferraro

Join our presenters on March 7th as they discuss:

- Services offered by the OTN
- Cases of how OTs have used telemedicine
- Member benefits and how to become an individual member of the OTN

About our presenters:

Christine is the Provincial Director Adoption at OTN with responsibility for Telemedicine Integration and Growth within Primary and Community Care. This involves growing business, managing customer relations and advocating for existing and potential customers whilst ensuring that OTN's services and processes deliver on the promise of excellence.

Lisa has been with OTN since 2002. As Regional Lead, she works with community hospitals and healthcare organizations in Toronto Central, Central and Central East LHINs. She guides and supports members as they incorporate telemedicine and virtual tools into their everyday practice, with the purpose of increasing access to care.

Target audience:

- **Applicable to any level**
- Anyone interested in incorporating telemedicine into their daily practice
